### **Abstract**

We seek to use the data from the Federal Office of Statistics about votations to gain an insight of trends among swiss citizens. Our idea is to analyze the shift of opinions from a french/german split to a country-side/city split.

#### **1 Questions we seek to answer**

#### **2 Work plan**

#### **3 Questions for the TAs**

- We would like to use election data to get a better understanding of why people vote in a certain way on different issues, but could not find data for election results. Could you point us towards such data?
